ALFATH RAMA ARDIANSYAH

FULL STACK SOFTWARE ENGINEER

Ciamis, West Java, Indonesia | +62 859 7478 1240 | alfath.alfath7878@gmail.com
github.com/pege-dev | linkedin.com/in/alfath-ra | pege.eu.org

PROFESSIONAL SUMMARY

Full stack developer with 6+ years of experience building web applications across healthcare, SaaS, digital media, and logistics. Skilled in end-to-end software development, API integration, relational database design, debugging, performance optimization, and production deployment. Interested in AI-assisted software engineering and coding evaluation.

WORK EXPERIENCE

Full Stack Developer | ITB Yankes Apr 2026 – Present

- Develop and maintain healthcare information systems using Laravel, Blade, JavaScript, and relational databases; implement revenue analytics, insurance claim reporting, and pharmacy workflows.
- Optimize report generation, reducing export time from approximately 38 seconds to 4 seconds; implement KPI dashboards, drill-down filters, and PDF/Excel exports.
- Integrate SATUSEHAT healthcare APIs (FHIR resources), including token refresh, ICD-10/KFA validation, and error handling; implement role-based access controls and operational improvements.

Frontend Developer | MuatMuat by AZLogistic Oct 2025 – Feb 2026

- Built responsive interfaces from UI/UX designs, integrated backend APIs, optimized JavaScript, CSS and image assets, and resolved frontend issues within project deadlines.

Web Developer | Wartaekonomi Group Jan 2023 – Jan 2026

- Developed and maintained digital media features with editorial and product teams; conducted website audits, accessibility improvements, and A/B testing to support engagement.

Freelance Full Stack Developer | PegeDev Jan 2020 – Present

- Deliver full stack applications from database and API design through responsive interfaces and deployment; implement third-party integrations, authentication, security controls, and performance improvements.

SELECTED PROJECTS

Pavora.id — POS & HRIS: Mobile-first multi-outlet platform with GPS geofenced attendance, shift scheduling, QRIS checkout, and reporting. TypeScript, Vite, Cloudflare Workers/D1, Capacitor.

Klino.id — Laundry SaaS: Multi-tenant platform with order management, online storefronts, WhatsApp notifications, thermal receipts, and role-based access. Next.js, React, Hono, PostgreSQL, Drizzle ORM, Docker.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, Python, SQL, HTML, CSS

Frameworks & data: React, Next.js, Vue, Node.js, Hono, Laravel, PostgreSQL, MySQL, Cloudflare D1

Tools & engineering: Git, GitHub, Docker, Linux, CI/CD, Playwright, Cloudflare Workers, REST APIs

EDUCATION

SMK Bhakti Kencana — Vocational High School, Clinical and Community Pharmacy | Jun 2021
